Improving Health for 40 Years

The UA College of Medicine opened in 1967 with 32 students. Four decades later, the college has created an innovative new curriculum that combines active learning with cutting-edge technology. | 8

Taking on a Killer

The Sarver Heart Center has led the way nationally and internationally in artificial heart technology, CPR and cardiovascular research. | 10

The Race is On

Disabled athletes are preparing to take on competitors from around the world at the 2008 Paralympics. | 15

It's a Small World

Researchers at Biosphere 2 are replicating environments ranging from tropical forests to deserts to study the effects of global climate change on Earth's ecosystems. | 31

An Island in Cyberspace

Students and faculty are interacting in new ways in an online version of the UA called Arizona Island. | 37

Going Green in the Desert

Eco-conscious efforts on campus include buildings that have sustainable designs, courses devoted to climate study and student efforts to conserve. | 42
