Tuition hikes highest in U.S.

By Nick Smith
Arizona Daily Wildcat

The survey was conducted on 67 flagship schools in all 50 states, accounting for 70 percent of cervical cancers, and HPV types 16 and 18 at 17 months after the end of the study, according to a press release. Gardasil was developed to target HPV types 16 and 18 throughout the course of the study. "We're obviously very pleased to have so many people take part in the walk, so they are in the third stage, which is why it is referred to as the "silent killer," said Olson. The UA and Tucson communities waited to raise money for ovarian cancer research at yesterday's fifth annual Cat Walk hosted by Greek Life programs. Cat Walk, which used to be an exclusively greek event to raise money for the Bobbi Olson Endowment Fund, was open to the entire Tucson community in hopes of raising more money, said Sarah Miller, vice president of programming in the Panhel lenic Association. The UA men's basketball guard Dan iel Dillon said he participated because "she is passionate about finding a cure for cancer because the disease has affected people in his life." Jennifer Bragman, a psychology junior, said she walked with her sorority members because she enjoys participating in this type of philanthropy because she enjoys participating in this type of philanthropy because she enjoys participating in this type of philanthropy. After Olson's speech, he and the UA men's basketball team led the 2-mile walk through campus, which started and ended on the UA Mall.
